Mockup Review Notes

Director: Ray Xia
Developer: Bella Pearce

Project: Hearthstone Wiki

Notes:
- Ray likes the blue/purple bg color – blends with the foreground more
- Ray & Bella are thinking about applying hovering effect on links/buttons to the character page
- The gradient on the images just looks awesome!!
- Ray has no preference in terms of layout between the 2 mockups
- Bella is thinking having 3 pages + the landing page
- Probably just CSS, but with clicking and hovering effects
- Like the Serif font – magical and epic
